Experience

Loops Digital

May 2020 - Present

Software Engineer

Being a Software Engineer at Loops Digital, I am responsible for developing and maintaining Full-Stack Web Applications with JavaScript.

- Actively involved in project planning, technical decisions, and time estimation.
- Communication with the client for a better understanding of the requirements and deliverables.
- Developed and released a Custom Shopify App (on MERN stack) for pawkettreats.com

Education

FUUAST

Jan 2017 – Jan 2021

Graduation in Computer Science

Completed Bachelor's in Computer Science from Federal Urdu University of Arts, Science, and Technology with a CGPA of 3.8.

- Made an Ignite Approved funded final year project (FYP).
- Built a student portal for facilitating teachers and CRs to share class lectures, assignments, and activities with students.

Other Perks

- Blogging: I share my knowledge about JavaScript and technology at Medium.
- Learning about algorithms, data structures, and cool JavaScript tricks.
- In my free time, I like to travel or watch a movie
